

The fastest way to get more done in Microsoft Office

From spinning up complex models to creating branded presentations, finance & banking teams work faster with Macabacus.

Solution Overview

-  **Financial Modeling**
Ensure accuracy and integrity of spreadsheet formulas.
-  **Brand Compliance**
Avoid deviation from brand identity.
-  **Presentation Automation**
Save time and create on-brand presentations.
-  **Content Management**
Share standardized content and templates across an organization.

About Macabacus

Macabacus is the world's leading suite of Microsoft Office productivity tools, used by thousands of professionals and teams in investment banking, corporate finance, private equity, and other finance capacities to prepare financial models and presentations with the highest levels of accuracy, efficiency and brand consistency.

Key Features

Macabacus powers productivity and accelerates workflows in high-performing teams and across entire organizations

Key features include:

-  **Formula Auditing**
Check the integrity of models using Macabacus' auditing tools, helping deliver error-free analyses to internal and external clients.
-  **Link to Excel**
Reliably link to Excel data and charts in PowerPoint and Word documents so that spreadsheet changes are seamlessly, efficiently, and accurately reflected in deliverables.
-  **Presentation Proofing**
Check for errors and inconsistencies related to formatting, layout, and content to ensure flawless presentation quality and brand compliance.
-  **Shared Libraries**
Improve content standardization and strengthen brand compliance across the organization with shared repositories for digital asset management of reusable content like slides, charts, templates, and images.
